OBJECTIVE

I aim to work in the software development field, focusing on Front-end development, always using the most current languages. I am confident that this will enhance my professional skills and ensure an effective balance between my work and personal goals. Over the past 5 years, I have worked as a Front-end systems analyst, mainly in the financial sector, gaining significant experience in software architecture. I carry out my activities with originality and caution, always aiming to achieve good results and establish lasting relationships with the company.

LANGUAGES AND SKILLS

Advanced Level
HTML, CSS, JavaScript, TypeScript, AWS, TDD, BDD NodeJs, Scrum, Kanban
